Dr. X sets you up for success. His process is great in the way we received valuable feedback consistently. He is very knowledgeable in the specific and related content pertaining to the course. Dr. G is someone I'd hope to have as a contact in my professional future.

- 1) Careful attention should be given to the organization of this class. Some assignments were given prematurely before students understood what they were doing. Writing assumptions and delimitations in the 2nd week before students had read any research themselves was mind-boggling. Perhaps, students should be allowed to focus on abstract and chapter 2 before diving into chapter 1.
- 2) It would be very helpful if students knew from the outset that 21 abstracts would be written and that 15 research-based abstract were needed for chapter 2.
- 3) This class should be considered 6 units, or at least more than 3. The work-load was huge.

I felt that the way this class was designed was extremely helpful and that it was designed to help us learn rather than taught to a test. I loved all of the deadlines ... extremely helpful in the end. Good class!

I was glad that he'd organized our work out so we turned in parts from the process as we went. This helped tremendously. I think he did a good job at allowing for questions and making sure we fully understood even if we were running short on time. He's an excellent professor!
