The 2003-2004 Report of Degrees Awarded by the University of Missouri

Executive Summary

This report includes graphs and tables of the annual number of degrees awarded by the University of Missouri System from fiscal year 1982-83 (FY83) through fiscal year 2003-2004 (FY04). The long-term trend of degrees awarded is shown graphically by campus (Figure 1) and by degree level within each campus (Figure 2). Table 1 of this report provides the number of awards by campus and level and by campus college (Tables 2.1-2.4) from FY 1983 to FY2004. In addition Tables 1 and 2.1-2.4 provide annual, 5 year and 10 year changes. Degrees awarded are reported by department in the Appendix in the *Department Detail Summary* (Tables 3.1-3.4). In all cases, academic degree programs that have moved from one unit to another and units that have moved from one school to another have been reported as if they had always been where they are now. The official annual reporting period is from July 1 to June 30 of the following calendar year. For example, FY04 includes summer and fall graduates from 2003 and the spring graduates of 2004. The data tables of the report show percentage annual change from FY03 to FY04 and FY04 relative to the prior 5-year and 10-year averages. Collectively, these statistics help to communicate whether recent change in production is short or long-term. Please note the axis scale range when considering graphs.

The highlights of the report include:

- The University of Missouri System awarded a record 12,741 degrees in FY04, a 5% increase in the number of degrees awarded in FY03. There has been an average 12% increase in the total number of degrees awarded since 1999 and a 16% increase since 1994.
- Since 1999, the average number of bachelors degrees awarded has increased by 9% and the average number of masters degrees has increased 19%.
- From FY03 to FY04 the number of doctorate degrees decreased by 3% and the number of graduate certificates decreased by 9%.
