? QUESTIONS

1. What are cardholder alerts?

! ANSWERS

Cardholder alerts are one of the easiest, fastest ways to confirm fraudulent use of a cardholder’s account.

Once a cardholder registers to receive cardholder alerts, an alert will be sent when suspicious transactions are identified on their account. They will be directed to reply to the alert and verify whether or not the transaction is valid.

If the cardholder responds that the transaction is:

- **Valid:** The hold placed on the account will be removed, and the card will be available for use.
- **Fraud:** The hold placed on the account will remain, and the cardholder will be directed to contact Cardholder Service. If fraud is confirmed, we will follow our normal process to block and reissue the account. Any transactions marked as fraud will initiate a case to our Fraud Recovery Team.
