

ADDENDUM NUMBER 1

DATED NOVEMBER 28, 2022

TO

SPECIFICATIONS TO REQUEST FOR BIDS #23066

FOR

AUTHORIZATION TO OPERATE GEOSPATIAL INFORMATION SYSTEM

MISSOURI

The above-entitled specifications are hereby modified as follows and except as set forth herein otherwise remain unchanged and in full force and effect.

Questions and Answers

- Question:** Please clarify if the due date is December 2nd or December 12? If December 2nd, we would request an extension to allow for sufficient time to complete and mail hard copy of the proposal for arrival before the due date.

Answer: The due date is December 12th.
- Question:** Typically, these types of systems require hardening. Will the University be handling the hardening, or would you like us to include "Hardening" in our proposal response as an optional task?

Answer: The University handles the hardening and all other on-site work.
- Question:** Does the University have policies and procedures in place to support the implementation plan requirement, or are you looking for support drafting policies and procedures to be included with the implementation plan? This is important to scoping the level of effort required to complete the project.

Answer: We have drafted policies for this system, but we would like an expert review of these policies to be included in scope to ensure their suitability.
- Question:** The current milestone schedule places an undue burden on a small company to carry labor costs for an extended period of time. Would the University consider allowing us to add additional milestones to align more closely with services delivered?

Answer: Yes. Custom milestones can be presented. All milestones must have a timeline of completion and designated amount.
- Question:** Can you please provide additional background/context/instructions as to what type of information you are trying to collect in Attachment C, The Supplier IdP integration Questionnaire? In reviewing the document, it does not appear to be relevant to the scope of work requested.

Answer: This document is used to address any technology-based aspects. If there are none, that is fine, simply document that.
