

University of Missouri System

Facts and Figures

Vision

The vision of the University of Missouri System is to advance the opportunities for success and well-being for Missouri, our nation and the world through transformative teaching, research, innovation, engagement and inclusion.

Mission

The mission of the University of Missouri System, as a land-grant university and Missouri's only public research and doctoral-level institution, is to achieve excellence in the discovery, dissemination, preservation and application of knowledge.

With an unwavering commitment to academic freedom and freedom of expression, the university educates students to become leaders, promotes lifelong learning by Missouri's citizens, fosters meaningful research and creative works, and serves as a catalyst for innovation, thereby advancing the educational, health, cultural, social and economic interests to benefit the people of Missouri, the nation, and the world.

History

The University of Missouri System has provided teaching, research and service to Missouri since 1839. The university, the first publicly supported institution of higher education to be established in the Louisiana Purchase territory, was shaped in accordance with the ideals of Thomas Jefferson, an early proponent of higher education.

The university remained a single campus until the School of Mines and Metallurgy was established in Rolla in 1870. In the same year, the university assumed land-grant responsibilities of providing higher education opportunities for all citizens.

In 1963, the university again expanded to better serve Missouri by founding a new campus in St. Louis and acquiring the University of Kansas City, creating the present four-campus system.

Today, the University of Missouri System is one of the nation's largest higher education institutions, with more than 68,000 students on four university campuses and an extension program with activities in every county of the state.
