Assessing the Impact of the COVID-19 Disruption on Student Success - FS2019 and FS2020 U/G Cohorts

Ronald D. Thompson, PhD, UM Sr. IR Analyst

Abstract:

I will discuss my attempts to assess the system-wide impact of the COVID-19 disruption of the academic schedule during Academic years 2019-20 and 2020-21, on Student Success.

My focus is on cohorts of full-time, degree-seeking, first time college, non-NRA, undergraduate students at the four universities comprising a public, Midwestern, research university system.

Assessing the Impact of the COVID-19 Disruption on Student Success - FS2019 and FS2020 U/G Cohorts

Ronald D. Thompson, PhD, UM Sr. IR Analyst

Outline:

The COVID-19 FTC Cohorts

FS2019 FTC Cohort: COVID-19 strikes in March 2020. Shuts down oncampus activity, sends students home, moves instruction on-line. Students and families are impacted by the pandemic.

FS2020 FTC Cohort: Instruction remains largely on-line for FS2020. Oncampus activities remain curtailed.

QUESTION: Expected "success" of these "COVID Cohorts"?

Stu Success – COVID Cohorts

UM FT, DS, FTC, non-NRA, U/G Cohorts

FS2019 + FS2020 (sans exclusive auditors)

	# Students	# 4-yr Grads	# 6-yr Grads	# 8-yr Grads
		(SS2023 + SS2024)	(SS2025 + SS2026)	(SS2027 + SS2028)
Residential Campuses	12,794			
Commuter Campuses	2,928			
TOTAL	15,722			

Stu Success – COVID Cohorts

UM FT, DS, FTC, non-NRA, U/G Cohorts FS2019 + FS2020 (sans exclusive auditors)						
	# Students	# 6-yr Grads	# 6-yr <mark>UM</mark> Grads			
			(SS2025 + SS2026)			
Residential Campuses	12,794

•						
TOTAL	15,722					

Stu Success – Before-COVID Cohorts

UM FT, DS, FTC, non-NRA, U/G Cohorts

FS2012 + FS2013 (sans exclusive auditors)

	# Students	(Actuals) # 6-yr <mark>UM</mark> Grads	р	95% CI for p-hat
		(SS2018 + SS2019)		
Residential Campuses	14,607	10,355	0.7089	0.7015 - 0.7162
Commuter Campuses	3,020	1,564	0.5179	0.5000 - 0.5357
TOTAL	17,627	11,919	0.6762	

Predict Stu Success – COVID Cohorts

UM FT, DS, FTC, non-NRA, U/G Cohorts FS2019 + FS2020 (sans exclusive auditors)							
	# Students	p-est (From Before Covid)	(Simple Forecast) # 6-yr UM Grads	"95% PI"			
			(SS2025 + SS2026)				
Residential Campuses	12,794	0.7089	9,070	8,974 9,163			
Commuter Campuses	2,928	0.5179	1,517	1,464 1,569			
TOTAL	15,722		10,587	10,438 – 10,732			

Stu Success using Early Acad Perf

• 1st-year success:

1-year retention (1st-year retention)

```
iHere_UM_NxtFS = 1 iff enrolled next Fall Census at UM;
iHere_UM_NxtFS = 0 otherwise
```

Early Acad Perf – Residential Campuses

UM FT, DS, FTC, non-NRA, U/G Cohorts (sans exclusive auditors)								
Early A	Acad Perf:	Reside:	<mark>ntial</mark> Cam	puses				
	# Students	# 00	# 01	# 10	# 11			
FS2012 + FS2013	14,607	1,132	656	1,005	11,814			
	100%	7.7%	4.5%	6.9%	80.9%			
FS2019 + FS2020	12,794	593	279	827	11,095			
	100%	4.6%	2.2%	6.5%	86.7%			

Early Acad Perf – Commuter Campuses

UM FT, DS, F	UM FT, DS, FTC, domestic, U/G cohorts (sans exclusive auditors)								
Early A	Acad Perf:	<mark>Commu</mark>	<mark>ıter</mark> Cam	puses					
	# Students	# 00	# 01	# 10	# 11				
FS2012 + FS2013	3,020	415	135	325	2,145				
	100%	13.7%	4.5%	10.8%	71.0%				
FS2019 + FS2020	2,928	337	112	369	2,110				
	100%	11.5%	3.8%	12.6%	72.1%				

Early Acad Perf

Comments:

 Early Acad Performance for UM RESIDENTIAL campuses has a different distribution for Before-COVID Cohorts vs. COVID Cohorts.

Calc Chi-Sq Homogeneity = 241.4 (> 12.59) with 6 = (2)(4-1) dof is significant at the 5% significance level.

 Early Acad Performance for UM COMMUTER campuses has a different distribution for Before-COVID Cohorts vs. COVID Cohorts.

Calc Chi-Sq Homogeneity = 11.89 (> 10.64) with 6 = (2)(4-1) dof is significant at the 10% significance level.

Maybe, incorporating Early Acad Perf will yield "better" UM-wide 6-year Grad forecasts for the COVID Cohorts!

- Apply Logistic Regression to the Before-COVID (FS2012 + FS2013)
 Cohorts, to model UM-wide 6-year Grads as a function of type of campus and early academic performance.
- Apply the resulting estimated model to forecast UM-wide 6-year Grads for the COVID (FS2019 + FS2020) Cohorts.

Predict Stu Success – COVID Cohorts

CONCLUSION:

The data suggest that there *is* a "COVID effect" (on Early Academic Performance). (Except, in a counterintuitive way!!)

Incorporating Early Academic Performance in a Logistic Regression model "calibrated" with **Before-COVID Cohort** data, yields different--*better*?-- forecasts of UM-wide 6-Year Grads for the COVID Cohorts, that reflect the COVID-19 "disruption."

Summary & Conclusion
